

Please stop the deregulation and monopolization of the media industry. You have already been allowing them to shove their garbage and bullcrap down our throats for years, and monopolization can never lead to a long-term, positive outcome. Roosevelt had the foresight to see this, and I hope that you do, too. If the thought is that it might somehow help the economy, it never lasts, as proven by history time and time again. Please don't base this decision solely on what is on the table right now, but look at what the future might hold. How will our decisions impact our grandchildren, and great-grandchildren? Please reconsider, and don't let money or influence blind you. See past the fog, and see the truth. Thank you.
